

**Batching Pigs**

# DMD

**3" - 14"**  
**76mm - 356mm**

**Options**

The 3" through 14" **DMD** series are all designed with a strong through bolt center mandrel. Other available options for these pigs:

- Gauging plates of aluminum or steel, and either in slotted or standard styles.

*Contact Apache for recommendations for your specific applications.*

**Description**

The **DMD** series is a take off of our **UM** series with all the same benefits offered. The addition of sealing discs improve performance in batching applications, removal of paraffin, or removing debris in natural gas pipelines. These batching pigs will also traverse pipeline anomalies of up to 25% without damage to the inline auxiliary equipment.

**Features**

The **DMD** series allow for additional wear resistance against the cup with the sealing discs providing additional pig support which is important on excessively long runs.
