

Batching Pigs

UM3

3" - 14"
76mm - 356mm

Options

The 3" through 14" **UM** series are all designed with a strong through bolt center mandrel. Other available options for these pigs:

- Gauging plates of aluminum or steel, and either in slotted or standard styles.

Contact Apache for recommendations for your specific applications.

Description

The **UM** series are well-built, steel bodied pigs designed for a variety of pipeline applications. General uses include batching, condensation removal, purging or light cleaning. These batching pigs will also traverse pipeline anomalies of up to 25% without damage to the inline auxiliary equipment.

Features

The **UM** series are also available in 2 or 4 cup configurations. Apache conical cups are made from castable urethane elastomers which are known for their toughness and abrasion resistance. Few materials can even approach the physical properties of our cup.
