

Series C Cups

2" - 48"

51mm - 1219mm

Description

The unique design of the **Series C Cup** provides both the cleaning advantages of a scraper cup and the flexibility of a conical cup. The wear surface is **three times larger** than any other scraper, which promotes longer cup life, while the pressure of the product keeps the cutting edge firmly against the pipe wall to provide an optimum seal. The flex area between the shank and the cleaning surface allows the Apache cup to traverse 15% reductions in pipe bore caused by buckling or flattening of the pipeline.

Series M Cups

6" - 48"

152mm - 1219mm

Description

The wide sealing surface provides long cup life, while the flexible design gives a continuous seal in the pipeline. Pipeline cleaners mounted with this cup can negotiate pipe bore reductions of up to 20%.

All **Series M Cups** are manufactured from high quality polyurethane and are available with a variety of wear resistant additives. Apache has also developed a proprietary chemically-resistant urethane suited specifically for severe environments such as hydrogen sulphide gas.
