

Cleaning Pigs

DCR

16" - 48"
406mm - 1219mm

Options

The **DCR** and **SCR** cleaning pigs are available in sizes 16" (406mm) through 48" (1219mm) and with either single or double high tempered, carbon steel brushes.

- Gauging plates of aluminum or steel, in slotted or standard styles.
- Carbon Steel, Stainless Steel or Plastic Brushes.

Description

Apache **DCR** cleaning pigs are used to remove debris from pipelines thereby improving valuable flowrates. Effective in all types of pipelines, the aggressive fixed steel brush provides optimal cleaning ability.

Features

All **DCR** cleaning pigs are equipped with an optional by-pass port, which provides a jetting action which prevents piling of contaminants in front of the pig. Single fixed wire brush (in **SCR** Model) are also available to further increase the versatility of these pigs.
