

Batching Pigs

XF

16" - 48"
406mm - 1219mm

Options

The Apache **XF** series are available in sizes 6" (152mm) through 48" (1219mm).

- Scraper cups and sealing discs are available in different durometers and materials.
- Gauging plates of aluminum or steel, and either in slotted or standard styles.
- Transmitter housings to accommodate tracking equipment.
- Cups and discs can be effortlessly changed or adapted to different configurations as the application dictates.

Apache will assist you in selecting the proper pig for your application.

Description

The **XF** pigs, with a combination of 3 sealing discs and 3 Apache Scraper Cups, provides a positive seal between dissimilar fluids and scraping capability. The increased surface contact area provided by the multiple sealing elements, significantly improves its sealing effectiveness. **XF** are typically used for longer distance batching operations and for light cleaning of pipelines.

Features

Configuration of the **XF** pig offers a sealing arrangement suitable for separation of dissimilar fluids together with light scraping of pipeline during longer distance operations.
