

## Tornado III

**2" - 4"**  
**51mm - 102mm**

### Description

The Tornado **III** has a cup/disc combination for maximum cleaning of small diameter lines. Its cup design permits this pig to be launched with a low differential pressure.

### Features

- Solid Cast urethane.
- Light weight.
- Available in different durometers.

## Tornado IV

**2" - 8"**  
**51mm - 203mm**

### Description

This one piece urethane cup pig is light weight and has the ability to traverse 1.5D bends and non-concentric pipes. The strategic placement of the cups allows the pig to easily pass by tees and full opening valves. The flexible pig body expands with pressure to further enhance sealing.

### Features

- All urethane construction.
- Light weight.
- Variety of durometers available.
