

## UT-UC4

6-14" (152-356mm)

The UT mandrel was designed to house a transmitter located in the center of the slotted universal mandrel. It can also accommodate virtually any configuration of cup, disc and brush. This allows the pig to clean and batch many dissimilar fluids.

The UT-UC4 is typically used in light cleaning during the construction phase. However, it can be used in all phases of pipeline cleaning. The UT-UC4 is equipped with four Series C cups specifically designed to perform efficiently and reliably.
