

BI-DIRECTIONAL

UT-ED

6-12" (152-356mm)

The UT mandrel was designed to house a transmitter located in the center of the slotted universal mandrel. It can also accommodate virtually any configuration of cup, disc and brush. This allows the pig to clean and batch many dissimilar fluids.

When it comes to displacing air and water during hydrostatic testing carried out during construction, the UT-ED gets the job done, quickly and efficiently. With its bi-directional design, it can travel in either direction.
