

JC3

2-4" (76-102mm)

The JC3 combines all of the advantages of the Apache Series C cup with the force of jetting action, essentially power-washing the pipeline. The grooves in the cup's surface create five times the cleaning surface making it possible to jet away suspending and stubborn wax, sand or other debris.

| Size | A | B | C | Part # |
|------|-------|--------|-------|------------|
| 2" | 4.000 | 5.875 | 2.125 | 70-4803-02 |
| 3" | 5.875 | 8.250 | 3.375 | 70-4803-03 |
| 4" | 7.125 | 10.125 | 4.375 | 70-4803-04 |

Designed to negotiate 3D or greater bends.

Features & Benefits:

- Every JC pig is equipped with two JC Series cups and one rear ported Series C cup. These cups are made with Reliathane, Apache's special blend of wear-resistant polyurethane.
- Jetted cups are very effective in low flow applications.

Options Available:

- Aluminum Gauge Plates in standard style. See page 6-4 for additional information.
- Radial Brush available in 3" and 4". See page (pitPRO) 5-24 for additional information.
