

# Circular Flange - Model RB

Effective. Reliable. Durable. Our Model RB brush is the best general purpose pipeline cleaning solution today. With years of experience, Apache will even custom-design the optimal brush for you. The RB Brush mounts to a pig body's flange by either single or multiple bolts. Brush trims are secured to a strong, custom-made plate, not pre-perforated sheets.

**Centre Hole RB**  
6-14" Flat

**Bolt Pattern RB**  
16-56" Flat

**UT-RB Pencil**  
6"-14"

## Features & Benefits:

### FLAT

- Effective when moderate to heavy cleaning is required.
- Provides 360 degree coverage installation.
- Excellent for bidirectional applications.
- Act as centering guide in the pipeline.
- Can be stacked for more aggressive cleaning.
- Easily negotiates bends and anomalies in the pipe bore.

### PENCIL

- Individual wires reach into pipeline pits, cleaning them thoroughly.
- Generally used before ILI runs to ensure a 360 degree clean.
- Extremely durable, so it can be used repeatedly.
- Available in Carbon Steel or Stainless Steel trim.
- Available in sizes ranging from 6" - 56"-plus.
- Its flexibility and ability to negotiate varying internal diameters make the pencil brush an excellent choice for cleaning multi diameter pipelines.

## Options Available:

- Custom trim lengths available on request.
- Trim Material – Carbon Steel, Stainless Steel & Plastic (Flat only).
- Flanges that carry the pencil brushes can be manufactured to use shorter trim lengths for scale or other problems that require a short strong brush with less flexibility.
- Alternatively, pencil brushes can feature longer trim to clean a pipeline that is, for example, partially obstructed by wax or dents or has design issues that call for the brush to flex, then resume cleaning.
- Can be custom-manufactured to suit all pig requirements.
