

PRODUCT LINE

PIPELINE PIGS

We specialize in innovative pig design and manufacturing using a variety of materials including steel, urethane and foam

- **BI-DIRECTIONAL STEEL BODIED PIGS**
for liquid displacement, cleaning, separation and batching
- **SCRAPER CUP STEEL BODIED PIGS**
for batching dissimilar fluids and long distance cleaning
- **CONICAL CUP STEEL BODIED PIGS**
for batching, condensation removal, purging or light cleaning
- **ALL-URETHANE PIGS**
for purging, cleaning or displacement and batching
- **FOAM PIGS**
negotiates both short radius bends and unexpected reductions in pipe bore

PIG PASSAGE INDICATORS

Our patented **pigPRO™ INDICATORS**

are designed to accurately detect the passage of a pipeline cleaner traveling within a pipeline system. Available with a variety of features and options, we have the visual and electronic indicator models.

● Series 57

● Series 55

● Series 53

CDI at APACHE
