

Apache's 909 Auger/Trencher teeth are forged and heat treated to ensure lasting durability. Raised shoulders help to protect pockets and the retainer plug installed in the cavity will insure against loss of teeth. Ditching jobs become easier and more efficient with an accurate design for a proper attack angle on trencher buckets.

- **Lasting Durability**
- **Maximum Wear Resistance**
- **High Impact Strength**
- **Buttons Are Affixed**

**QUANTITIES
OF EITHER
5,000 or 10,000***
