## UT MANDREL OPTION

6-14" (52-356mm)

The UT mandrel is one very useful pig. Although its primary design feature is to house a transmitter located in the center of the slotted universal mandrel, it can also accommodate virtually any configuration of cup, disc and brush. This also allows the pig to clean and batch many dissimilar fluids.

### Features & Benefits:

- The UT is the only small diameter steel mandrel pig we manufacture that features a transmitter cavity in the middle of the mandrel to accommodate electronic pig tracking equipment.
- Standard bumper noses cushion the pig and help to protect in-line auxiliary equipment, preventing damage.
- To maximize durability, all discs are made from Reliathane, Apache's special blend of wear-resistant polyurethane.

### Options Available:

- Circular flange brushes in the following types and trim materials:
  1. Trim types – flat wire or pencil.
  2. Trim material – carbon steel, stainless steel or plastic.
- CARVER discs.
- Aluminum gauge plates in slotted or standard styles.
- Magnets can be used to either collect ferrous and other construction debris, or they can be used to provide a change in magnetic field required by non-intrusive pig signaler detection devices.
