

JC3

6-14" (152-356mm)

The JC3 combines all of the advantages of the Apache Series C cup with the force of jetting action, essentially power-washing the pipeline. The grooves in the cup's surface create five times the cleaning surface making it possible to jet away suspending and stubborn wax, sand or other debris.

| Size | A | B | C | Part # |
|------|--------|--------|--------|------------|
| 6" | 10.038 | 13.705 | 6.375 | 70-4803-06 |
| 8" | 12.547 | 16.205 | 8.500 | 70-4803-08 |
| 10" | 15.619 | 19.422 | 10.625 | 70-4803-10 |
| 12" | 20.250 | 22.740 | 12.750 | 70-4803-12 |
| 14" | 21.544 | 25.850 | 13.875 | 70-4803-14 |

Designed to negotiate 1.5D or greater bends.

Features & Benefits:

- Every JC pig is equipped with two JC Series cups and one rear ported Series C cup. These cups are made with Reliathane, Apache's special blend of wear-resistant polyurethane.
- Jetted cups are very effective in low flow applications.

Options Available:

- Aluminum Gauge Plates in standard or slotted styles. See page 6-4 for additional information.
- Radial Brush options available. See page 5-23 for additional information.
- Magnets to collect metallic debris. See page 6-2 for additional information.
