

# Dual Body Configuration

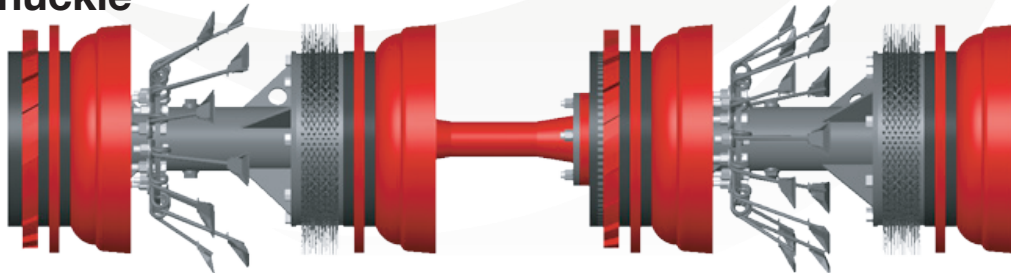

6-48" (203-1219mm)

Apache offers a dual body configuration on steel body pigs ranging from 6" to 48". Apache knuckle joints change in style based on the diameter of the pig and can accommodate any combination of configurations. A dual body configuration provides double the cleaning capabilities with a single run and ensures both pigs are held together as they travel through the pipeline.

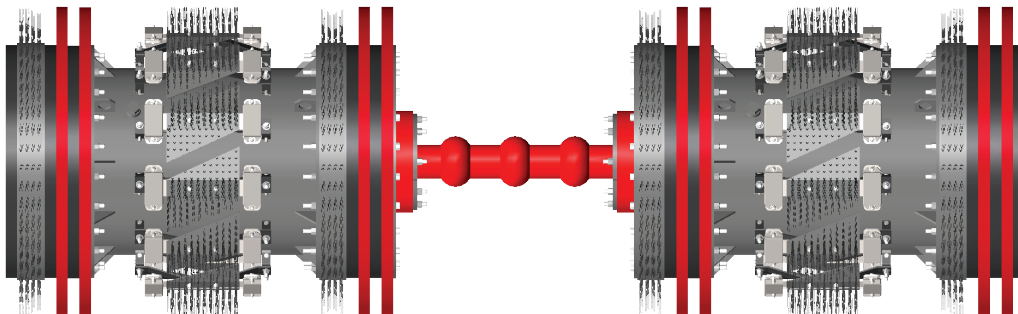

## 6"-14" Knuckle

## 16"-24" Knuckle

## 30"-48" Knuckle

Knuckle style changes based on the size of pig.
